

A Better Way to Do Business.

Speakeasy Business VoIP combines broadband connectivity, local and long distance phone service, PBX functionality, and conferencing to deliver a complete communications package that saves time and money while helping you compete like never before. **What can VoIP do for your business?**

Stay Available

Advanced VoIP features can extend your voice service capabilities to improve client service. Use Hunt Groups to ensure calls are answered or Simultaneous Ring for an instant "hot line". Combine forwarding features to extend service calls to mobile and home phones.

Improve Accuracy & Efficiency

With the Voicemail as Email feature, voicemail messages are forwarded as .wav file email attachments. Send or save these .wav files to eliminate restatement of messages, prevent mistakes, and create a record of important information.

Call from Anywhere

The Remote Office feature extends the rich set of business line services to any location with a broadband connection. Employees can place calls from remote phones while showing the business line on Caller ID and billing calls back to the office.

Coordinate Multiple Offices

Enjoy a single voicemail system, call forwarding between sites, and a convenient private dial plan. Setup Auto Attendants that direct calls between sites to leverage employee expertise.

Web Conferencing

Deliver more effective sales presentations, improve team productivity, and limit travel. Moderators can present with MS Excel, Word, and PowerPoint files, use a web-based GUI to record proceedings, and even mute/drop callers.

For attorneys and legal offices, voice communications are central to successful cases. Speakeasy Business VoIP offers enhanced voice services that satisfy the challenging requirements of legal offices. With highly reliable service, call tracking, call screening, centralized directory integration, call prioritization, and assistant/manager features, Speakeasy puts attorneys and staff in control of their communications.

As a hosted solution, Speakeasy Business VoIP also eliminates the overhead and distractions of site-based equipment. Your service can extend to multiple offices, delivering a consistent set of features to all employees, including those in home offices.

Drive Productivity and Maintain Client Focus

Legal work typically revolves around the client. Speakeasy Business VoIP enables partners and staff to provide clients with priority call access and improved service. For larger corporate accounts, call center features and attendant services ensure that higher volume client issues are quickly routed to appropriate staff for more rapid resolution.

The solution also improves attorney productivity, driving more effective work with clients and among internal staff with features like on-demand conferencing and "click-to-dial."

With an intuitive web interface and extensive training support, Speakeasy Business VoIP is easy to learn and use. The productivity advantages begin almost immediately.

Consolidate Vendors and Save

A firm's total communications costs typically include equipment/phone leases (or depreciation), maintenance, support, access, and minutes. Speakeasy bundles these services together with your broadband to provide one predictable monthly bill, simplified management, and savings of 30% or more.
