

### A Better Way to Do Business.

Speakeasy Business VoIP combines broadband connectivity, local and long distance phone service, PBX functionality, and conferencing to deliver a complete communications package that saves time and money while helping you compete like never before. **What can VoIP do for your business?**

#### Patient Service

Advanced VoIP features can extend your voice service capabilities to improve client service. Use Hunt Groups to ensure calls are answered or Simultaneous Ring for an instant "hot line". Combine forwarding features to extend service calls to mobile and home phones.

#### One Number

Speakeasy Business VoIP enables up to five phones to ring along with an employee's work line. Eliminate the confusion of juggling mobile, home, and second office lines. Ensure key staff are always available, and keep mobile and home telephone numbers private.

#### Accuracy & Efficiency

With the Voicemail as Email feature, voicemail messages are forwarded as .wav file email attachments. Send or save these .wav files to eliminate restatement of messages, prevent mistakes, and create a record of important information.

#### Mobility

Find Me / Follow Me features increase staff productivity and complement wireless service. Users can forward calls to mobile phones, second office lines, home lines, and/or other phones. They can even select or reject calls originating from specific numbers.

In addition, the Remote Office feature can extend your VoIP services to any location with a broadband connection. Employees can place calls from remote phones while showing the business line on Caller ID and billing calls back to the office.

Speakeasy Business VoIP provides enhanced telecom services for the unique requirements of medical offices. These services exceed the capabilities of PBXs without the management overhead and risk.

With Speakeasy Business VoIP, your office can improve patient satisfaction, streamline operations, and increase staff work flexibility. Advanced VoIP calling features integrate multiple secondary sites, home offices, and remote staff. Plus, you can consolidate vendors and save money when you choose Speakeasy as your single provider for voice and data services.

#### Improve Efficiency with Tailored Capabilities

Medical offices support a range of activities that include patient check-in, scheduling, records management, treatment, referrals, diagnosis, and testing. Sometimes the bottleneck in completing these activities is a quick phone call. Speakeasy Business VoIP provides intelligent call routing, attendant and directory services that efficiently connect callers and speed task completion.

Office operations revolve around doctors, nurses, administrators, lab staff, and others. Each job is different and needs tailored communications support. Speakeasy provides enhanced calling features that can be tailored to support mobility, work-at-home, selective accept/reject that each position might require.

Unlike many technologies, Speakeasy provides new capabilities without sacrificing simplicity. Services are configured in real-time through an intuitive web interface.

#### Cut Costs and Simplify Management

Enjoy one predictable monthly bill for all your voice and data services. When compared with the costs for PBX maintenance and support, lease expenses, line connectivity, telephone numbers, long distance/local minutes, and carrier services fees, Speakeasy Business VoIP can offer savings of 30% or more.
