

## A Better Way to Do Business.

Speakeasy Business VoIP combines broadband connectivity, local and long distance phone service, PBX functionality, and conferencing to deliver a complete communications package that saves time and money while helping you compete like never before. **What can VoIP do for your business?**

### Work Smarter

Advanced VoIP features provide unprecedented mobility and productivity benefits, while helping you stay responsive to customers and investors.

### Work from Anywhere

The Remote Office feature extends VoIP services to any location with a broadband connection. Employees can place calls from remote phones while showing the business line on Caller ID and billing calls back to the office.

### Voicemail as Email

Receive voice messages as email attachments with Caller ID information in the subject line. Prioritize at a glance, save message files for as long as you like, and forward to anyone.

### Total Control

Decide who can reach you, when, and how. Give out one business number and program it to ring simultaneously or sequentially at up to five additional phones. Forward all calls or only those from specific numbers.

### Web-based Administration

Manage your entire VoIP system from any location through an easy-to-use web interface.

### Auto Attendant

Don't have a receptionist or 24-hour call center? Use this feature to greet callers and route calls to individual employees or voicemail boxes.

*"Speakeasy's solutions allow us to focus on our core business, without wasting time and resources on dealing with unreliable connectivity and maintaining our own phone system."*

*- Daryn Nakhuda, CTO, Spam Arrest*

Technology-focused businesses need reliable communications and a leading edge image. Start-up companies need to conserve cash, minimize administration hassles, and impress investors with efficient resource management.

Speakeasy Business VoIP meets all these needs with a smart, integrated solution that can also help you manage rapid growth and provide excellent customer service.

### Start Fast. Run Lean.

Because Speakeasy Business VoIP is a hosted solution, all you need to get started is connectivity from Speakeasy, IP phones, and a voice gateway. That means a much lower capital outlay than with a traditional phone systems—generally about 60% lower. Savings continue with reasonable, predictable monthly bills that cover all your voice and broadband services. Choose unlimited plans for toll-free calling to 22 countries and 48 states.

### Scale Effortlessly

As your business grows, Speakeasy Business VoIP makes it easy to add new phone seats, with no rewiring hassles. You can even reserve phone number blocks and keep extra phones on hand.

### Future Proof

With the increasing convergence of telecommunications, media, and software applications, experts agree that VoIP is becoming the essential foundation for a future-focused business. You can count on Speakeasy to keep pace with VoIP innovation.

 **speakeasy**<sup>®</sup> Communications Simplified™

"Why switch to Speakeasy Business VoIP? Because it's cheaper, it's easier, and it's the future. We're paying 27% less for nearly three times as many phone lines, and because long distance is free, our monthly telecomm costs are completely predictable. Speakeasy's Web tool makes system administration a matter of pointing and clicking—even from home or on the road. Speakeasy Business VoIP gives small companies like ours the capabilities of a PBX solution for just a small, up-front investment and none of the management headaches. There's no solution like it."

— Russell Williams, Founder and Executive Producer, **Flying Lab Software**

Seattle game developer Flying Lab Software is the maker of the critically acclaimed *Rails Across America*, which received Computer Gaming World's Editor's Choice honor and Best Multiplayer Game of the Year Award from Computer Games Magazine. Flying Lab's latest project is *Pirates of the Burning Sea*, a multi-player online game set in the age of sail.

	CHALLENGE	SOLUTION	RESULTS
AFFORDABLE	As a small-but-growing business, Flying Lab needed a telecomm solution less expensive than a traditional PBX system.	Speakeasy Business VoIP's five-systems-in-one efficiency and hosted PBX features eliminated the costs of a traditional in-house PBX system.	Flying Lab <b>cut its monthly telecomm charges by 27%</b> per month while more than doubling its lines and upgrading to a hosted, easy-to-manage PBX system.
SCALABLE	Poised for rapid growth, Flying Lab wanted a phone system that could scale quickly with minimal overhead.	Traditional cabling and wiring associated with moves/adds/changes were replaced with Web-based simplicity and new phone lines are added as needed.	Adding phone lines is as easy as adding new computer users, <b>with a 40% lower per-line cost.</b>
EASY	Flying Lab's founder wears many hats—including that of "phone system administrator." He needed management and configuration to be easy and fast.	Speakeasy Business VoIP's Web tool offers features that enable remote workers to stay connected as if in the office.	Web-based system administration is now a "no brainer" and can be done from home or while traveling which <b>saved time and offered much needed flexibility.</b>
SEAMLESS	With many employees working at home or on the road, a seamless solution to support remote workers was imperative.	Speakeasy Business VoIP enabled off-site employees anywhere in the world to be integrated into the network as smoothly as if they were working in the office.	Now phoning a Flying Lab employee across the country is indistinguishable from calling one across the office. Employees use the easy Web tool to <b>configure their phone features as if they were on-site.</b>
